

EGC-PW DATA SHEET

Granular Activated Carbon

The Activated Carbon EGC-PW is a granular activated carbon derived from vegetable origin manufactured from wood for vapor phase applications. For its high adsorption capacity, EGC-PW is an ideal product for use in wastewater applications. Available in 4x10 mesh size with fine pore structure and extraordinary surface area, EGC-PW is ideal for utilization in removal of sewage odors and gaseous contaminants.

PARAMETERS	SPECIFICATIONS	TYPICAL PROPERTIES
Moisture Content (as packed), %	12	max
Apparent Density, g/cc	0.23	
Iodine Number, mg I ₂ /g	800	min
4x10 Mesh Size, %	5	max

EGC-PW

GRANULAR ACTIVATED CARBON

Standard packaging is in 28 lbs bags. Other packaging is available upon request.
